

Schött-Druckguß – Aluminium die casting in perfection, this is the task for all of us!

Human	Constructive co-operation with our customers, suppliers and in internal actions and decisions - taking into account the strengths but also the weaknesses of each employee.
Machine	Use of modern and efficient technology in all manufacturing processes - for the safe, environmentally friendly, energy-saving and cost-effective manufacture of products.
Method	Knowing, communicating and using suitable methods, our expertise and future-oriented processes - to recognise, eliminate and avoid errors and their causes.
Material	Procurement of only fault-free and cost-effective material - to fulfil internal and customer-related requirements, as well as its use in consideration of efficient use.
Environment	Observing the economic, ecological, social and customer-related expectations of our company in order to safeguard our location and our jobs.

In addition to earnings, productivity and product/service quality, customer satisfaction, employee satisfaction, occupational health and safety as well as environmentally friendly and energy-efficient production are important factors for the success of our company, which must be continuously evaluated and improved.

We are happy to make our contribution to society by attaching particular importance to protecting the environment and conserving resources. We are committed to the sustainable management of resources and recognise our responsibility to posterity. We work in compliance with standards, statutory regulations and environmental and energy-related requirements. Our integrated management system fulfils the requirements of IATF 16949, DIN EN ISO 14001 and DIN EN ISO 50001.

The management, all supervisors and executives are required to create the conditions for the realisation of these tasks, to monitor the work results and to implement necessary improvements. Supervisors must always act as role models.

The management representatives, in cooperation with the management, define the objectives and key performance indicators at least once a year in order to be able to evaluate the management system, the work results and the performance achieved.

We are committed to complying with legal and official requirements in the areas of occupational health and safety, environmental protection and energy law. The management undertakes to enforce the company policy and the defined objectives and to provide the resources required for implementation.

All employees are required to implement this company policy and its objectives in their daily actions and decisions and to continuously improve work results and performance.
